

Front-End Developer

Who we are

BusPatrol is a Safety Tech company. We develop and deploy our technology internationally to turn school buses into Smart Buses, equipped with video, GPS, telemetry, data processing, and archiving. We are looking for experienced front-end developers to join and help guide our growing team. The majority of the team is based in New Orleans, with some remote members.

Who you are

You're a developer with experience executing and delivering well-tested code. You've worked on scalable web applications and services. You like to work with a team, discussing feature requirements and planning together. You are comfortable sharing your insights to drive a better process. You are able to adapt to the ever-changing front-end ecosystem.

Responsibilities

- Design, build, and maintain efficient, reusable, and tested code
- Communicate with back-end team to make proper use of APIs
- Contribute in all phases of the development lifecycle
- Be a productive member of an inclusive team where pairing and peer reviewed code are valued
- Follow best practices (continuous integration, SCRUM, refactoring, and code standards)
- Drive continuous adoption and integration of relevant new technologies into design

Requirements

- 2+ years experience as a front-end developer
- Demonstrable knowledge of front-end technologies such as JavaScript (ES6+), HTML5, CSS3
- Knowledge of version control, such as Git
- Knowledge of RESTful architecture standards
- Proven work experience in a software development team
- Passion for writing great, simple, clean, efficient code
- BS/MS degree in Computer Science or equivalent experience

Front-End Developer

Nice to haves

- Vue.js experience
- SASS experience
- IoT Technologies
- Workable knowledge of MySQL, Postgres, or AWS Aurora databases
