

Full-stack Developer Posting

Who we are:

BusPatrol is a Safety Tech company. We develop and deploy our technology internationally to turn school buses into Smart Buses, equipped with video, GPS, telemetry, data processing, and archiving. We are looking for experienced Ruby developers to join and help guide our growing team. The majority of the team is based in New Orleans, with some remote members.

Who you are:

You're a developer with experience executing and delivering well tested code. You've worked on scalable web applications and services. You like to work with a team, discussing feature requirements and planning together. You are comfortable sharing your insights to drive a better process.

Responsibilities

- Design, build, and maintain efficient, reusable, and tested code
- Engineer documented, scalable, and secure APIs from deprecated legacy code
- Contribute in all phases of the development lifecycle
- Be a productive member of an inclusive team where pairing and peer reviewed code are valued
- Follow best practices (continuous integration, SCRUM, refactoring, and code standards)
- Drive continuous adoption and integration of relevant new technologies into design

Requirements

- 3+ years experience as a full stack developer
- Ruby, Python experience
- Proven work experience in a software development team
- Demonstrable knowledge of front-end technologies such as JavaScript, HTML5, CSS3
- Passion for writing great, simple, clean, efficient code
- Workable knowledge of MySQL, Postgres, or AWS Aurora databases
- BS/MS degree in Computer Science or equivalent experience
- Knowledge of version control, such as Git

Full-stack Developer Posting

Nice to haves

- Rails / Rack experience
- Vue.js experience
- SASS experience
- IoT Technologies
